(a) lateral tracking across cutter-mass dose
sham
gain from
the residual
frozen base
adaptive
lateral error (mm)
cutter-mass dose (× nominal)
(b) cut-height tracking across cutter-mass dose
sham
cut-height error (mm)
cutter-mass dose (× nominal)
(c) separately estimated lateral residual components
general residual gain
plant-dependent residual component
+3.8
+3.9
+4.1
+7.4
paired residual gain (mm)
cutter-mass dose (× nominal)
