Four independent electro-hydraulic actuator channels

J1 · Slew
Drehzapfen

C1 · A · B · u1 · 4/3 proportional valve

J2 · Lift
Ausleger I

C2 · A · B · u2 · 4/3 proportional valve

J3 · Knuckle
Ausleger II

C3 · A · B · u3 · 4/3 proportional valve

J4 · Head pivot
Messerkopf-Schwenk

C4 · A · B · u4 · 4/3 proportional valve

J5 (mowing-head rotation) carries no cylinder: the swivel-link pair couples it to the head carrier, so four cylinders drive five joints.

Hydraulic power unit

P · T

Accumulator
gas-charged, damps ripple

Pressure-relief valve
caps supply pressure

Pressure sensor
supply feedback

Variable-speed pump
Qp = Dp · ω

Prime mover
carrier PTO

Suction filter
return conditioning

Reservoir
tank

pressure line P · return line T · valve command · cylinder body
